

**Press Release**  
**Singapore - May 20, 2008**

**SingTel launches *mio TV on Mobile* service with Nokia Siemens Networks solution**

**Singapore Telecommunications Limited (SingTel) launches its Mobile TV service using Nokia Siemens Networks' Mobile TV streaming solution. This complements its *mio TV* service and adds another dimension to accessing quality pay TV content anytime, anywhere.**

Nokia Siemens Networks' Mobile TV streaming deployment, including a mobile client application, is one of its first in Asia Pacific. SingTel will be the first mobile operator to launch this service in Singapore. A particular highlight of the new service is the excellent user experience it offers by providing live TV channels with electronic program guide (EPG) information and video-on-demand (VoD)

SingTel has chosen Nokia Siemens Networks' Media Delivery Solution (MDS) 3.5 as its Mobile TV platform. The phone application is based on Adobe's Flash Lite technology.

Nokia Siemens Networks' Mobile TV solution can be extended to support various standards including video streaming (unicast), and future technologies.

The contract also includes a range of services which has allowed SingTel to rapidly start its new Mobile TV offering and guarantee ongoing platform stability and quality.

Said Wong Soon Nam, Vice President, Consumer Marketing, SingTel, "With SingTel's *mio TV on Mobile* service, users now have the option to extend their viewing pleasure anytime, anywhere. With Nokia Siemens Networks' Mobile TV solution, users will enjoy the same familiarity they are used to at home and not miss their favourite shows when they are on the move."

"We're honoured to play a major role in SingTel's Mobile TV plans in Singapore," added Thomas Yeo, Head of SingTel Singapore Customer Team, Nokia Siemens Networks. "This deal demonstrates our ability to partner with forward thinking operators like SingTel to make the most of industry-leading solutions such as Nokia Siemens Networks' MDS."

This is Nokia Siemens Networks' first Singapore deal with SingTel and marks a milestone for both companies in pushing the Mobile TV envelope in the country.

**About Singapore Telecommunications Limited (SingTel)**

SingTel is Asia's leading communications group with operations and investments around the world. Serving both the corporate and consumer markets, it is committed to bringing the best of global communications to customers in the Asia Pacific and beyond.

With significant operations in Singapore and Australia (through wholly-owned subsidiary SingTel Optus), the Group provides a comprehensive portfolio of services that include voice and data services over fixed, wireless and Internet platforms.

To serve the needs of multi-national corporations, SingTel has a network of 37 offices in 19 countries and territories throughout Asia Pacific, Europe and the United States. These offices enable SingTel to deliver reliable and quality network solutions to its customers, either on its own or jointly with local partners.

The Group also has major investments in Bangladesh, India, Indonesia, Pakistan, the Philippines and Thailand. Together with its regional partners, SingTel is Asia's largest multi-market mobile operator, serving more than 185 million customers in eight markets.

SingTel employs more than 20,000 people worldwide and had a turnover of S\$14.84 billion (US\$10.05 billion) and net profit after tax of S\$3.96 billion (US\$2.68 billion) for the year ended 31 March 2008.
