

# BOTFIGHTERS

Join forces against a corrupt regime in this futuristic pervasive combat game. The battle is on the streets.

The year is 2104. The world-spanning Global Nation controls 99% of our planet's resources. It is a sprawling bureaucracy, bloated and corrupt. The bureaucrats wield total power over 17 billion people, and only a few dare to oppose.

But still a war is being waged, a war where rebels fight for the freedom to control their own lives and where corporate loyalists strive to uphold the system that once saved our planet from extinction. You start as a newly graduated bot pilot, and then the action begins as you join the ferocious battles of the botfighters.

**BotFighters 2** is the next generation of the successful location-based mobile Massively Multiplayer Online Game BotFighters. It's an exciting pervasive combat game where you play in the real world; using location technology, the streets become the game arena and any stranger might be your ally or enemy!

The real world is the game arena. This is a truly pervasive game that blends with your everyday life. Using location technology, the player's movement is mirrored in the game. Your own neighborhood could turn out to be hostile territory, and weapons and power-ups can be found on the streets. BotFighters spans across the mobile and the Web.

Comprehensive game world and episodic storyline. Every three months, a new episode is released. Each episode has a cliffhanger ending, keeping the players constantly on their toes. Join one of the two opposing factions in the battle for the future of our world.

Develop your botfighter and your bot with new skills and equipment. Buy, find, and steal parts to build the perfect bot.

Sophisticated yet easy-to-use game mechanism enabling tactical battles where brainpower matters as much as weapons and equipment. Examine your opposition before choosing your strategy and weapons, and react to your opponents counter-attacks.

Participate in an active community. Chat and interact with other players, exchange information and learn new tactics.

Open-ended mission structure. Solve missions including stealing secret information and destroying enemy installations.

## It's Alive – redefining reality

It's Alive ([www.itsalive.com](http://www.itsalive.com)) is a game development studio focusing on *pervasive games*: massively multiplayer online games (MMOG) with the real world as game arena. The games are played on multiple devices and involve the player 24 hours a day, everywhere. Launching the world's first location-based game BotFighters® in 2000, It's Alive is now working with game publishers, media companies, and mobile operators in creating games that will redefine gaming in the 21<sup>st</sup> century.
