

Gamica Goes Multiplayer!

Ex Machina is proud to announce that leading European developer Gamica (makers of *Lord of the Boards* and the *Manapack Series*) will release a series of multiplayer games this summer, fully powered by Deus+ technology!

Set in the classic environment of the 1860s America, *Wild West Saloon* is a single and multi-player collection of card games; you can play against each other, or go solitaire.

Boobytrap is *Worms* meets *Bomberman*; a turn-based multiplayer game where you try to be the only survivor in Booby trapped levels! The game features 10 different characters with special weapons.

Also coming soon: *Lucky Ranch Tycoon*. Part simulation, part racing game, *Lucky Ranch* will have you breed and raise horses to lead them to victory in thrilling multiplayer races.

Working demo's of *Wild West Saloon* are available for most regular color-screen J2ME/GPRS phones, including Nokia Series 40 and upwards. Handset requirements are HTTP support and 64K of available memory.
