## Security applications

Data Guard (compatible with Series 80 devices)
Data Guard is the application that helps the end user to secure important and sensitive information on the Nokia 9500/9300. User can securely store: credit cards numbers, user names, passwords, codes, accounts, PIN numbers, web pages, addresses, and much more. The users sensitive informations are stored in a secure databases. Data Guard uses password protection and strong industry encryption technologies standard with 128-bit data encryption (RSA/DSA) to keep the information private and secure.

**Secure Storage (compatible with Series 80 devices)**
The security application that helps to manage and securely store sensitive files and folders inside the Nokia 9500/9300. In one easy way end users are able to encrypt the private documents. Secure Storage uses password protection and strong industry encryption technologies standard with 128-bit data encryption (RSA/ DSA) to keep the information private and secure.

Entertainment

Infrared Remote/Total irRemote (compatible with Series 60, 80 and UIQ devices equipped with irDA)
The award winning Psiloc irRemote and Total irRemote applications can turn a Symbian phone into a remote control. This truly ingenious application can help replace a multitude of various remote controls that tend to accumulate in every house with just one device – and keep the phone handy. Psiloc irRemote is very simple to use: just select the brand and the type of device (TV, DVD, VCR, CD, etc.) and it works. Psiloc Total irRemote has all the functionality of its smaller brother but can also learn. The built in device library may miss some of the more unique devices, so the user can download the relevant Philips Pronto CCF or Lirc codes from their respective websites thus expanding range of compatible equipment. The codes can be sent via infrared, Bluetooth or email and the file format will be automatically recognized and PsilocirRemote automatically started.

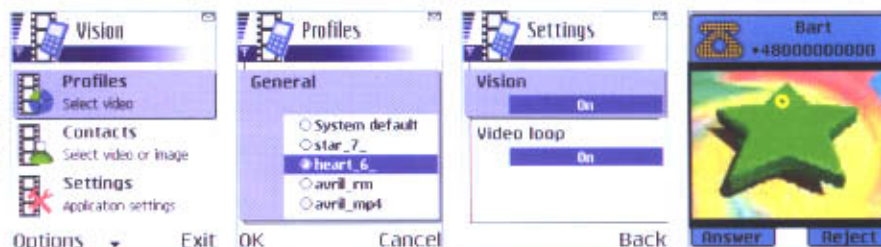

Screen Saver (compatible with Series 60, and UIQ devices)
Psiloc Screen Saver enhances the bundled screen saver the functionality by adding powerful screen savers: Screen Saver fully supports all indicators signal level, battery level, missed calls and inbox status. In a "sleep mode" Psiloc Screen Saver falls into the background and is replaced by the original screen saver after a specified time (1, 4 or 8 hours). This is to protect battery life from the some more power hungry screen savers.

Psiloc Vision (compatible with Series 60)
Psiloc Vision in a new application that signals incoming calls with a video, as well as the ring tone. The package comes with three videos, but users' own recordings can also be used. Another option is to have a full screen image shown instead of a video, using any stored image from a family snapshot to a company logo.
