

# Run'n Mail

## Game Description

Be the fastest to post all the letters but watch your step! You might stumble or get vertigo before you finish the level...

Collect all the envelopes scattered throughout the levels and return them to the red letter box to access the next level.

Be warned... some doors don't lead back to same place. Like any good postman, be on the lookout!

## Game score

A cute little game, but with the difficulty level of some of the most Dynamic! Extensive gameplay and a real gaming challenge after the third level. Another success for Kaolink, who always know how to please the players!
