

### About FERMA

As a global solution provider, FERMA is helping carriers and service providers in more than 40 countries providing turnkey solutions and enabling Multimedia & Interactive Communication Services. A whole range of customized solutions can quickly be set up from the products that FERMA has already developed on its open Divaphone® platform, in order to meet each operator's needs perfectly, taking into consideration both the technological requirements and the various targeted user segments. Built on open standards (e.g. VxML, SIP), all products are designed for fixed, mobile and internet networks to fit into the GSM, CDMA or NGN infrastructure

- **PreP@y Suite**: data rating node, broadband, multimedia messaging, M-Commerce
- **Top Up**: e-voucher, POS, recharge roaming
- **Mailis®**: from Call Notify up to Video Mail
- **Navis** : Content services enabler
- **SMS Anti-Spam & Fraud Screening**

With sales of EURO 40 million in 2004, FERMA products deployed in more than 40 countries.
